

July 14, 2025

Dear Chair Crandell, Vice Chair Rasmussen, Supervisors Sabatier, Pyska and Owen,

The Lake County Community Action Project (CAP) would like to express our strong support for the proposed temporary moratorium being presented to the Board on Tuesday July 15th.

CAP has expressed concerns on multiple occasions regarding several issues with the current ordinance including, but not limited to: water usage, fiscal impacts, impacts on residents and the review of currently permitted projects. A temporary moratorium would provide the County an opportunity to look at the contributions and impacts of an industry that is still experiencing growing pains.

With regulations at the State level changing rapidly and the uncertainty of where the industry currently stands in Lake County, we feel it is prudent for the Board of Supervisors to implement a temporary moratorium at this juncture rather than to continually make revisions in an attempt to keep pace.

Respectfully,

Peter Luchetti
